

PRAIRIE THERAPY

Osteopathic Manual Therapist Needed!

We are currently seeking another Osteopathic Manual Therapist to join our multidisciplinary team in January 2019! Presently, we have one certified Osteopathic Manual Therapist working with us, as well as an Osteopathic Manual Therapy Candidate and an Osteopathic Manual Therapy student. We are looking for a highly motivated and enthusiastic individual, interested in finding a long-term fit. This is a unique position, offering an opportunity for mentorship and the possibility for co-treating with an experienced Osteopathic Manual Therapist.

At Prairie Therapy we are dedicated to keeping people active. Started in 2010, we have added to the team as we have found team members that fit in. Our team is currently made up of Certified Athletic Therapists, Osteopathic Manual Therapists, Registered Massage Therapists, Traditional Chinese Medicine, and Acupuncturists. Although we may have different academic backgrounds, everyone on the Prairie Therapy team is committed to getting the right patient in with the right provider.

Prairie Therapy believes that fitting in with our team of professionals is more important than the certifications after your name. We have grown considerably in the last six years, both in physical space and in team size. Our practitioners are dedicated and interested in longstanding careers with Prairie Therapy; most of them working with us for the past 3-6 years. If you are interested in joining a true team of integrated health care providers, we want to hear from you.

While at Prairie Therapy, everything will be provided for you. From clinic supplies to marketing materials and business cards; there are no added expenses. We also offer online booking, direct billing (as able), full time reception, and linen service for all our practitioners. If you think there is something we are missing, we want to work to make it possible.

Requirements:

- Diploma of Osteopathic Manual Therapy, or equivalent (new grads welcome)
- Professional liability insurance
- Experience in a clinical setting is essential
- Basic computer skills are required (Microsoft Office, as well as online programs)
- Must be very service oriented and able to work with many different types of patients and people
- Ability to interact professionally and effectively with people at all levels (students, staff, coaches, nurses, and doctors)
- Ability to work independently, as part of a larger team model

Start date of January 1, 2019 is negotiable.

Closing date for the position will be October 31, 2018.

Please send all cover letters and resumes to info@prairietherapy.ca, subject "Osteo Position"
